IB Geography – Reasons For Growth in Leisure Time

Complete the table below by analysing the images (larger images available on [ibgeographypods](http://ibgeographypods.org)) and deciding on the factor and how it has influenced the amount of leisure time that people experience.

Image	Factor	Description of influence on leisure time
 <p style="font-size: small;">Hours worked per worker, average annual HumanProgress.org Source: Conference Board, Total Economic Database</p>		
		
 <p style="font-size: x-small;">Countries Succeeding & Failing to Grow Disposable Incomes Annual growth rate of disposable household income in selected countries in 2018 Source: OECD</p>		
 <p style="font-size: x-small;">La vie en repos Men, 2016 Source: OECD The Economist</p>		
 <p style="font-size: x-small;">Self-employed jobs, 1959-2017 (UK, seasonally adjusted, as percentage of total workforce jobs) Source: Office for National Statistics, workforce jobs series</p>		

Name

Using the two images below, explain how and why gender disparity can occur in terms of total leisure time.

Blank space for student response.

Gender Gap in Time Use

Hours per week

	Men	Women	Diff
All adults ages 18 to 64			
Total work time	45.6	45.2	0.4
Paid work	33.8	23.9	9.9
Housework	9.3	15.5	-6.3
Child care	2.5	5.8	-3.3
Leisure	33.7	29.0	4.7
Adults with children younger than 18 at home			
Total work time	54.9	53.0	2.0
Paid work	38.4	21.6	16.8
Housework	9.5	17.7	-8.2
Child care	7.0	13.6	-6.5
Leisure	27.7	25.0	2.7
Adults without children younger than 18 at home			
Total work time	40.8	39.9	0.9
Paid work	31.4	25.4	6.0
Housework	9.2	14.0	-4.9
Child care*	0.2	0.4	-0.3
Leisure	36.8	31.7	5.1

*Child care time is not limited to caring for own children.
