

Name

IB DP Geography – Climate & Dimming due to volcanic eruptions

Process	Place																				
 <p>The graph displays the monthly temperature change in degrees Celsius from 1990 to 1992. The y-axis ranges from -0.5 to +0.4. A red line shows the temperature change, which fluctuates around a dashed horizontal line at 0°C. A significant dip in temperature is observed in late 1991, reaching approximately -0.4°C, which is labeled as the eruption of Mount Pinatubo. The temperature then gradually recovers but remains below the 0°C baseline through 1992.</p> <table border="1"><caption>Approximate data points from the temperature change graph</caption><thead><tr><th>Year</th><th>Temperature Change (°C)</th></tr></thead><tbody><tr><td>1990 (Start)</td><td>0.0</td></tr><tr><td>1990 (Mid)</td><td>+0.15</td></tr><tr><td>1990 (End)</td><td>+0.05</td></tr><tr><td>1991 (Start)</td><td>+0.35</td></tr><tr><td>1991 (Mid)</td><td>+0.25</td></tr><tr><td>1991 (End)</td><td>+0.1</td></tr><tr><td>1992 (Start)</td><td>-0.15</td></tr><tr><td>1992 (Mid)</td><td>-0.25</td></tr><tr><td>1992 (End)</td><td>-0.1</td></tr></tbody></table>		Year	Temperature Change (°C)	1990 (Start)	0.0	1990 (Mid)	+0.15	1990 (End)	+0.05	1991 (Start)	+0.35	1991 (Mid)	+0.25	1991 (End)	+0.1	1992 (Start)	-0.15	1992 (Mid)	-0.25	1992 (End)	-0.1
Year	Temperature Change (°C)																				
1990 (Start)	0.0																				
1990 (Mid)	+0.15																				
1990 (End)	+0.05																				
1991 (Start)	+0.35
